

NOTICE:
CHIPPER SERVICE FOR STORM DAMAGE

The Township guidelines for chipper service after the most recent winter storm remain the same as usual:

The size of the pile of limbs must be limited to ten (10) feet long, six (6) feet high and to the depth of the limbs. Larger piles will not be chipped. Tree limbs must be stacked with all cut ends of branches facing the street. The chipper is for tree limbs only. The chipper cannot be used for vines or shrubs.

The Township Department of Public Works does not have the manpower to provide chipper service beyond these limits. Residents can take additional amounts of limbs to the Township Convenience Center for disposal. Alternative methods of limb disposal is the responsibility of the property owner.
